

The machine professionals

Precision and Productiveness for metal-cutting Machine Tools

Certified in accordance with
DIN EN ISO 9001:2000

For the second generation of first-class service. The company Staudacher was founded in 1979 by Hans Staudacher. Today, his son Markus manages the now highly qualified service provider for metal-cutting machine tools. Staudacher is well equipped for mechanical, electrical and electronic tasks. Since the end of 2005 Staudacher is your certified specialist partner in accordance with DIN EN ISO 9001:2000.

The company

Our Technical Knowledge Stands on Tradition

The Staudacher service scope for metal-cutting machines comprises:

- Repair, maintenance, conversion, modernisation and reconditioning of plants and peripheral equipment (conventional and CNC/PLC-controlled, every year of manufacture, all brands, special-purpose machines as well; performance in accordance with DIN or manufacturer standard) Special-purpose machinery manufacture according to your needs. Conventional, PLC or CNC-controlled
- Your choice of performance of the work on site or in the Staudacher Technology Centre
- Design, installation, instruction and training courses (machines and controls)
- Partner for the outsourcing of repairs and maintenance and prompt service for emergencies
- Technical consulting, expert opinions and checks using our expertise, networking and coordination of specialist partners, support in the purchase of used machines

Work to rule? Only when talking about complying with deadlines, specifications or standards. Otherwise, all Staudacher employees have only one goal: Securely offering good service. The will is important here, but so is the ability. This is why handymen and specialists work at Staudacher in all areas of activity:

- Mechanics and mechatronics
- Pneumatics and hydraulics
- Electrical and electronic engineering and electrical installation

The team

Healthy Ambition for Satisfied Customers

- Electronics and control engineering (programming, installation for controls from Fanuc, Heidenhain, Mazak, Mitsubishi, NUM, Siemens)
- Measurements, analyses, expert opinions and checks using our expertise (accuracy certificates for the machine geometry, electronic or conventional, laser measurement and compensation, measurement reports, analyses of form and position tolerance, stress and resilience measurement, adjustment, calibration etc.)

There is room - sufficient space is always reserved for the repair, maintenance, conversion, modernisation and reconditioning of your machine. The Staudacher Service Centre is a well equipped 750 square metre hall.

A visit to us is recommended for your machines, in particular when conversion, modernisation and reconditioning are concerned. Special fitness measures at Staudacher are:

- Checking and restoring the machine geometry

- Grinding guideways, coating and shaving carriage units
- Exchanging wear parts
- Checking and exchanging electric components
- Engine and transmission repair, checking and replacing the bearings of drives
- Production of replacement parts (manufacture of metal and plastic parts according to a drawing or design)
- Sheet metal forming and welding work
- Tuning machines and plants
- Complete or partial painting

The Technology Centre

Machines Get in Shape in Our Hall

Machine data: Completely disassembled milling head for a bed-type milling machine delivered with an irregular vertical-head housing that is not true to size

Example of work

Universal milling head CME

Our services: Milling out and bushing in line with the axle in the Staudacher Service Centre, exchange of defective parts, complete reassembly with 4 new bevel gear pairings for 3000 revolutions per minute (standard: 1000 revolutions per minute), function test and ready-for-operation delivery.

Route: From B 10 (Stuttgart - Göppingen - Geislingen) to direction Eisingen-Nord, then following the signs to Eisingen-Nord und Salach.

In the heart of Baden-Württemberg

Staudacher Service is the Most Obvious Choice
